Abstract : The Government has been actively pursuing economic development in order to keep up the competitive advantage of Hong Kong. The traditional Four Key Industries in Hong Kong, including financial services, tourism, trading and logistics, and professional and producer services, have been the driving force of Hong Kong's economic growth, providing impetus to growth of other sectors and creating employment. Besides, selected emerging industries, including cultural and creative industries, medical services, education services, innovation and technology, testing and certification services, and environmental industries, have also been identified as enjoying advantages for further development. A feature article analysing the economic contribution and employment situation in respect of the Four Key Industries and selected emerging industries in 2013 was published in the April 2015 issue of the Hong Kong Monthly Digest of Statistics. This article is an updated version of the article published in 2015, with figures for 2014 incorporated.

System requirement : To view PDF file, you need to use the [Adobe Acrobat Reader](#) software and [Adobe Asian Fonts Pack](#) (for supporting Chinese characters), which are available free of charge at the [Adobe Systems Incorporated](#) website.
